

Data Services for Business Intelligence

MAKE SMARTER DECISIONS AND STAY COMPLIANT

Unlock Total Data Control and Take Action

TrackTik Data Lab and Data Replication services turn complex security data into clear, visual analytics that strengthen operational oversight.

By automating visualization and reporting with Data Lab, or integrating TrackTik data into your own BI solution, you can make informed decisions, visualize trends, and maximize compliance.

WWW

OUTCOMES

Data Lab and Data Replication services power your operational intelligence with:

- Faster, smarter decision making
- Greater operational efficiency
- Comprehensive data control
- Enhanced transparency

Data Lab Features

Custom Dashboards & Reporting

Easily build, personalize, and share dashboards and reports to track key metrics in real time.

Self-Service Data Access

Query, visualize, and analyze data without IT support for faster, smarter decision-making.

Comprehensive Data Integration

Seamlessly combine TrackTik data with other sources and use preferred analytics tools like Tableau or Power BI.

Full Data Ownership & Availability

Host your own replicated database for complete control, reliable access, and robust disaster recovery.
