

Smarter Security Starts Here.

TrackTik transforms security operations with real-time tools for managing guard tours, tracking assets, assigning tasks, and responding to incidents. The integrated platform simplifies performance monitoring, improves accountability, and keeps teams connected.

TrackTik seamlessly integrates with existing security infrastructure, including access control systems, CCTV networks, alarm systems, and IoT devices, creating a unified security ecosystem. Built for security teams of all sizes, TrackTik scales seamlessly with your business, while reducing operational costs and improving response times. Turn security data into a strategic advantage.

ONE PLATFORM FOR EVERY GUARDING STRATEGY

Manned Guarding

Guard tours and incident reports

Mobile Patrol

Runsheets and route optimization

Remote Guarding

Command Center and operator dispatch

Trusted by Security Leaders Across the Globe

“Dispatching, security guard activity tracking, and scheduling are seamlessly handled. TrackTik saves us time in our business operations and significantly reduces costs.”

Nick Karwani,
Security Consulting Group CEO and President

The Technology Behind Superior Security Performance

Checkpoints and Tours	Configure designated site checkpoints for guards to scan during patrols—verifying their presence and ensuring complete site coverage.
GPS Tracking and Maps	Monitor guard locations in real time using dynamic maps for enhanced oversight and safety.
Incident Reports	Define templates for guards to easily submit incident reports with photos and notes directly from the field—keeping documentation consistent and verified.
Mobile App	Keep guards accountable by making them tech-enabled to quickly access schedules, scan checkpoints, file reports, accept dispatch requests, and communicate instantly.
Asset Management	Minimize the risk of lost and stolen items with sophisticated asset inventory management, check-in and check-out procedures, and comprehensive reporting.
Site Tasks	Assign, track, and confirm completion of specific duties for each location—ensuring operational consistency, accountability, and high service standards across all sites.
Visitor Management	Register, track, and easily manage all visitor entries and exits at each site.
Mobile Patrol and Dispatch	Assign and coordinate patrols, optimize routes for maximum efficiency, and ensure rapid incident response.
Command Center	Centralize all incoming security events into a unified dashboard—empowering operators to quickly assess situations and coordinate effective incident response.
Open API Ecosystem	Build a more connected, responsive, and efficient security infrastructure with integrations for alarm events, camera alerts, analytics tools, and more.
