

Site Tasks

Discover Guard Accountability and Scalable Service Growth

Transform Tasks into Strategic Security Management

How do you demonstrate the proactive risk mitigation efforts your security teams perform daily, such as safety equipment inspections, perimeter controls, and data server monitoring?

Without a structured way to capture these activities, you may be missing a crucial opportunity to showcase your comprehensive service offering.

Site Tasks Features

Live Guard Tracking

Assign recurring or ad-hoc tasks and monitor progress for timely completion.

Linked Assets & Reports

Track assets that are needed to complete a task, with clear guard instructions.

Standardized Tasks

Enable templated instructions and reports across clients for consistent service delivery.

Unified Task Management

Connect mobile and static guards for swift communication or job reassignment.

Outcomes

Site Tasks Adds Advanced Capabilities to Help You:

- Scale your business
- Improve service delivery
- Demonstrate your value
- Hold guards accountable
