# Asset Tracking

Track

Protect

Manage Assets

+ FULL VISIBILITY

Manage Asset Inventory and Prevent Loss

Asset tracking adds clear accountability to minimize the risk of lost or stolen items like keys, uniforms, and other equipment.

With advanced inventory management, check-in/check-out process via barcode scan, automated alerts, and comprehensive reporting, security teams have the essential tools to save time managing assets.

OUTCOMES

Asset Tracking centralizes asset control to help you:

- Gain asset visibility
- Increase team accountability
- Reduce loss and delays
- Automate asset workflows

Asset Tracking Features

Detailed Transaction History

Log every asset check-in and check-out with timestamps, user details, and return deadlines to ensure precise tracking and full.

Real-Time Dashboards

Get instant visibility into asset movement and overdue items to take quickly spot issues before they lead to loss or theft.

Automated Notifications

SMS, email, or push notifications are triggered for overdue assets to prompt timely follow-up and minimize the risk of loss.

Barcode Association

Assign barcodes to assets to enable quick and accurate scanning for check-in and check-out—improving accuracy and reducing the risk of loss.
